

*Baton Rouge
Area Foundation*

Bike Share is a transportation option that is best for short distance point trips. The Baton Rouge Area Foundation, local government, BREC, LSU, Southern University and many private businesses are partnering to start Bike Share across Baton Rouge parishes. Service is expected to begin in 2017, with stations where demand is predicted to be greatest: Downtown, LSU, City Park, Baton Rouge Lakes, and Southern University and nearby neighborhoods.

Bike Baton Rouge is dedicated to Promoting bicycling and walking as transportation options in the greater Baton Rouge area, making these modes of transportation as safe and convenient as possible, and educating the public on the associated environmental, economic, and health-related benefits of biking and walking. For more information on how you can be a part of Bike Baton Rouge please visit <https://bikebr.org/>

The Downtown Greenway is trail system that is designed to link the northern and southern sections of the city to the downtown area. The North Boulevard Promenade section of the Downtown Greenway is part of a 2.75 mile interconnected network of bike/pedestrian pathways connecting Baton Rouge's public parks and recreational facilities, inner city communities, and cultural attractions through the use of greenways, or linear parks. To learn more visit <https://downtownbatonrouge.org/places/baton-rouge/explore-green-spaces/downtown-greenway/>

BREC's Capital Area Pathways Project (CAPP) is an initiative to identify routes and build a network of connecting trails and greenways throughout East Baton Rouge Parish. BREC, in the interest of public safety, has located pathways off of roadways within public rights of way such as utility, stream, and drainage corridors. The Master Plan illustrates proposed CAPP trails, identifies existing segments as well as those being implemented in cooperation with other local organizations (including the proposed EBRP Loop, and Levee Trail, and on-street pathways), and locates BREC parks. For more info visit <http://www.brec.org/index.cfm/page/CAPPtrailsImprovements>
